

Safety harness with 6 anchoring points - P-81 type

EN 813

EN 361

EN 358

Code: P-81

The P-81 safety harness is a harness with 6 points:

- a dorsal anchoring point (aluminum ring)
- 2 frontal anchoring loops in the chest area (made of straps)
- 2 lateral anchoring points fixed on the work positioning belt
- a frontal anchoring point in the lumbar area (made of strap loops) for the sitting position.

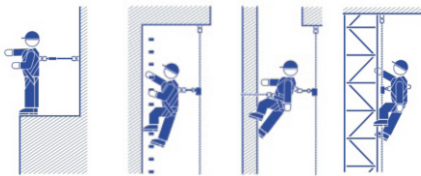

The complex harness is provided with a harness including a flexible protective plate for shoulders, with separate regulating systems for the leg's straps (thighs) and the chest straps (shoulders).

The locking system contains automatic snap buckles.

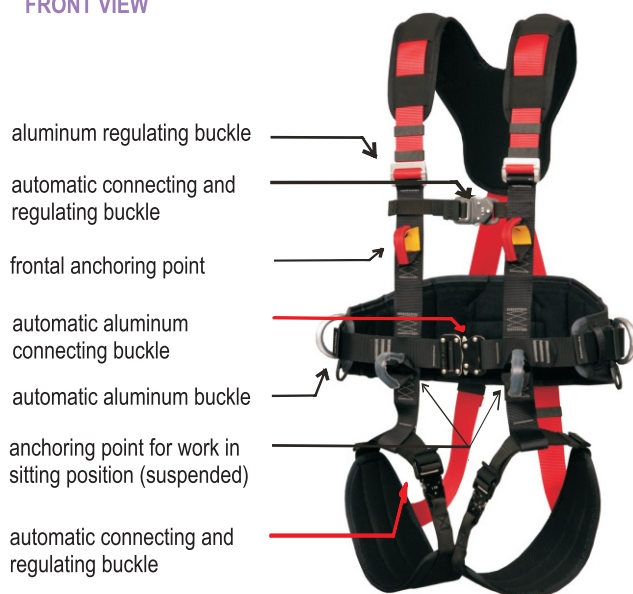

In order to be more comfortable during work, the harness is provided with straps for the leg's thighs with protective supports.

The P-81 safety harnesses are available in two sizes: M - XL and XXL.
