

Tools baskets - for works at height

Code: TA 501 20
TA 502 20
TA 502 20-L

Having various forms and sizes, the tools baskets are recommended for use at works at height on electrical poles of LV, MV and HV overhead lines. The tools baskets can be used at lifting, lowering the tools at the working position on the pole and also during work, for temporary storage. Using the tools baskets offers to the electrician improved conditions and reduces the risk of falling of tools.

At request, the baskets can be delivered along with a snap hook.

| Code | Material | Diameter (mm) | Length (mm) |
|---------------|----------|---------------|-------------|
| TA 501 20 | PVC | 240 | 280 |
| TA 502 20 | PVC | 300 | 400 |
| TA 502 20 - L | PVC | 300 | 1000 |
